Self-Service Kiosk

Overview:

Multi-functional self-service terminal integrating payment, scanning, and printing functions to optimize service processes and reduce manual intervention.

Key Features:

Flexible display configuration, NFC/QR code payment, thermal printer, modular design.

Application Scenarios:

Fast food chains, shopping malls, cinemas, stations, banks.

Self-service Kiosk

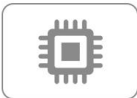

Nova-D01

- Modular design for quick deployment in various scenarios
- High-definition dual-camera system supporting facial recognition and auto-tracking
- Flexible installation options: wall-mounted or freestanding
- Multiple payment methods: NFC, QR code, cash
- Expandable with printing module, scanning module
- 27" (1920*1080) default single screen (Customized dual screen)

Wall-mounted Kiosks

Overview:

Space-saving self-service terminal suitable for compact service environments, enabling fast self-service through scanning and touchscreen interaction.

Key Features:

Flexible display configuration, QR code payment, thermal printer, modular design.

Application Scenarios:

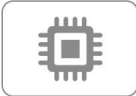

Self-service areas, shopping malls, hospital lobbies, parking entrances, airports.

Wall-mounted Kiosk

Eon-A01

- Space-saving wall-mounted design for compact areas
- Customizable display size options: 21" / 27"
- Modular structure for easy maintenance and upgrades
- Multiple payment options, enhancing user convenience
- Efficient thermal printing to reduce queue time

Desktop All-in-One POS

Overview:

Desktop all-in-one POS terminal integrating various payment methods, ideal for retail and F&B sectors.

Key Features:

Flexible screen configuration, printer, scanner, RFID reader.

Application Scenarios:

Convenience stores, coffee shops, retail counters.

Desktop All-in-one POS

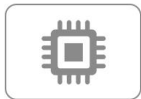

Eva-A01

- Desktop all-in-one design integrating payment, printing, and scanning functions
- Flexible dual-screen configuration for enhanced customer interaction
- Supports multiple payment methods: card, QR code, NFC
- Optional cash drawer module to secure cash transactions
- Modular hardware layout for easy expansion and upgrades

AI Smart Scale

Overview:

AI-powered smart scale that identifies products and weights for automatic checkout, utilizing advanced image recognition technology.

Key Features:

High-precision sensors, AI recognition system, QR code payment, data upload.

Application Scenarios:

Fresh produce sections, staff canteens, self-service vending zones.

AI Smart Scale

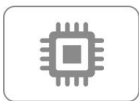

Echo-A01

- AI-powered image recognition for automatic product identification and weighing
- Real-time data upload for improved inventory management
- High-precision sensors for accurate weighing
- Contactless operation to minimize human contact
- QR code payment integration for efficient checkout

Smart Cart

Overview:

Intelligent shopping cart equipped with an electronic display and scanning module to optimize shopping and checkout experiences.

Key Features:

Real-time billing, product recognition, navigation guidance, QR code payment.

Application Scenarios:

Large supermarkets, warehouse-style stores, self-service shopping centers.

Smart Cart

Core-A01

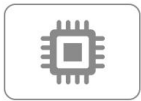

- Intelligent shopping cart system to reduce checkout waiting time
- Real-time navigation and product recognition for a seamless shopping experience
- Built-in payment module for on-the-go checkout
- Path tracking and data analysis to optimize store layout

Smart Locker

Overview:

Intelligent locker system supporting remote monitoring and QR code access, designed for storage and distribution management.

Key Features:

Electronic lock control, camera monitoring, SMS notification, remote unlocking.

Application Scenarios:

Logistics stations, gyms, dormitories, hotel lobbies.

Smart locker

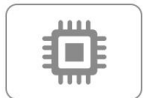

Luma-Y01

- Remote monitoring and smart access control for enhanced security
- Multiple locker sizes to accommodate diverse storage needs
- Various unlocking methods: QR code, NFC, facial recognition
- Optional surveillance camera for comprehensive monitoring
- Configurable modules for cold storage, standard storage, or reinforced security

Vending Machine

Overview:

Multi-functional vending machine supporting various product types, equipped with payment and temperature control modules.

Key Features:

Temperature control, QR code payment, inventory monitoring, ad display.

Application Scenarios:

Office buildings, community blocks, shopping mall entrances.

Vending Machine

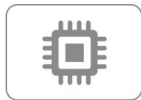

Neon-A01

- Modular storage compartments for multiple product types
- Temperature control system for refrigerated and frozen products
- Integrated advertising display for additional revenue generation
- Multiple payment methods: QR code, NFC, cash
- Real-time inventory monitoring to minimize out-of-stock situations

Self-Service Card Replacement Kiosk

Overview:

Self-service card replacement terminal for rapid issuance of bank cards, membership cards, and more.

Key Features:

Identity verification, card printing, NFC encoding, QR code payment.

Application Scenarios:

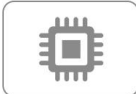

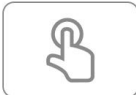

Banks, telecom stores, public service centers.

Self-service Carf Replacement Kiosk

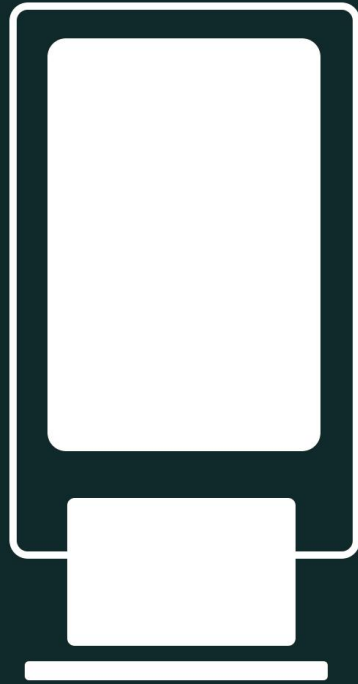

Astra-A01

- Self-service card replacement system to reduce waiting times
- Built-in camera for secure identity verification
- NFC card encoding and printing for rapid card issuance
- Modular structure for easy maintenance and upgrades
- Optional ID recognition module for faster card processing

Specification(Windows)

				
Windows	RK3288	2GB	16GB	Change the card
				
21.5	PCAP	2D scanner	Modular design	Electronic pen

Digital Signage

Overview:

Digital display system for advertising and information dissemination, supporting remote content management.

Key Features:

HD display, network control, scheduled playback, dynamic ads.

Application Scenarios:

Shopping mall atriums, exhibition centers, office lobbies, subway stations.

Digital Signage

Vita-A01

- High-definition display for dynamic content playback in 1080p or 4K
- Remote content management for centralized control
- Scheduled playback and preset content for 24/7 operation
- Anti-glare screen design for both indoor and outdoor use
- Multi-screen splicing option to create impactful visual displays

Accessories

Overview:

Supporting equipment and accessories, including scanners, printers, card readers, RFID modules, cash drawers, etc.

Key Features:

Universal compatibility, plug-and-play, modular design, high durability.

Application Scenarios:

Various self-service terminals, POS systems, warehousing equipment.

Accessories

Accessories

- Harmonized style, elevated texture
- Enhanced Experience: Synergy Effect
- Wire-Free, Desk Refreshed
- Seamless Connectivity, Smart Synergy
- Tailored Solutions, Precision Fit
